

Get the technical truth

A decision a board can make, with findings another person can reproduce.

01 When this fits

You need to decide whether a system will hold, a codebase is safe for AI-assisted change, a supplier has finished the job, or an acquisition carries hidden technical exposure.

02 The published route

Architecture Review

£12,000 fixed | 2 weeks

Agentic-Ready Codebase Analysis

£8,000 fixed | 1-2 weeks

Depth Audit

£6,000 fixed | 1 week

Technical Due Diligence

£15,000 fixed | 2-3 weeks

Prices exclude VAT. The signed proposal fixes scope and fees.

03 What you receive

- The question, review boundary, evidence examined and missing access stated before a verdict.
- Written findings with observation, reproduction, severity, business consequence and evidence that would change the conclusion.
- S1: risk register and roadmap. S2: eight-part agentic score and sample gate. S3: acceptance findings ledger. S4: buyer-template diligence and red flags. The quote names which one you buy.

04 Acceptance

The chosen report answers its opening decision, cites inspected evidence for material findings, names untested areas and provides a prioritised next action. You can reproduce the sampled checks or challenge their limits.

05 Who decides and delivers

You: Name the decision and share the relevant source, architecture, access, contracts, incidents or operators; identify who will act on the conclusion.

Zero Drift: Choose the smallest review that answers that decision, challenge the claims with failure-capable checks and present a recommendation with its limits.

06 Agree before work starts

Access, confidentiality, review sample and board format are fixed at the start. An expedited diligence request is priced separately; the published S4 expedite addition is 50%.

07 The honest boundary

A sample-based review is not a certification or assurance that no hidden defect exists. Legal and financial diligence remain with the relevant specialists.
